

I respectfully urge you to reject NAB's petition 04-160. XM Satellite Radio provides me with greater variety THAN regular AM and FM radio. Also, you don't have to listen to long commercials or boring commentary. With XM, you get what you want to hear ... MUSIC. Also with XM you don't hear a song and then an hour later you hear the same thing. AM and FM radio are fine for those who just want that and nothing else. BUT DON'T STIFLE MY XM RADIO!!! I pay for it gladly and want to continue to hear the commerical free, non repetitive programming.
